

NEXGEN UTILITY SALES

The team at **NexGen Utility Sales** is committed to working with quality manufacturers and partners to ensure our customers receive the highest quality products and service. We are pleased to cover the mid-Atlantic, southeast US and Caribbean for most of our lines and look forward to the opportunity to support you.

FIELD SERVICE

***Electrical
Technologies***

BAE Batteries USA provides superior batteries for critical back up power and energy storage requirements. BAE provides a full line of stationary VLA and VRLA batteries, chargers, racks, spill containment, & accessories.

Contact Fabricators Inc (CFI) has expertise in manufacturing new and obsolete electrical contacts for electrical equipment. CFI is able to provide contact kits for LTCs of any manufacturer and can provide many hard to find electrical components in a short timeframe.

Delta Star Inc . is the premier manufacturer of power transformers, and world leader for mobile substations, and mobile protection systems. Delta Star produces power transformers up to 300MVA and mobile substation up to 100MVA.

Delta Star Field Service performs service work on transformers from any OEM. Examples include: Regasketing, Testing, Oil processing, Oil retrofills, LTC maintenance and Retrofits. Provides aftermarket parts for any OEM. Transformer as well as the DeltAir inert air system.

Electrical Technologies produces passive cooling chambers for critical back up battery systems. These passive cooling chambers are designed to harvest daily temperature fluctuations to provide a suitable environment for batteries, without the need of air conditioning systems, saving the substation auxiliary power.

Filmax manufactures filters and filtration systems primarily for use in the electric utility space for filtering LTC oil, single & three phase regulators, oil circuit breakers, and transformers. Filmax also produces customized mobile filtration systems and inventories Guardian Desiccant breathers.

Foster Fuels provides emergency fuel services throughout the U.S. In addition to providing propane delivery, we are also your source for diesel fuel, heating oil, and more. Their mission is to consistently provide you with excellent service, quality products, and fair prices. Foster Fuels is an ideal partner for storm response power restoration efforts.

Isolet produces instrument transformers including current and potential transformers, indoor and outdoor type. Isolet provides for both metering and protection applications. Low and medium voltage, up to 35kV. Meets the requirements for instrument transformers per IEEE & IEC standards.

KONČAR produces high voltage instrument transformers. Current transformers, potential/voltage transformers and SSVTs. From 69kV to 800kV.

NOMAD produces mobile/transportable battery power systems aimed toward supporting peak power requirements, On-demand power for islanding of events, government assistance projects, natural disasters, micro grid support, and maximum utilization of renewable energy resources.

Oberon Technologies specializes in the design of virtual reality systems that are targeted towards custom modules such as safety training, recurrent maintenance training, remote troubleshooting. Using Oberon VR technology employees and customers can train and test on complex processes in a secure environment.

Paradoxe PX3 Power Flo fans offer superior transformer cooling solutions. The PX3 fans are designed to provide better cooling and longer fan lifetime. Designed with a self-cooling motor enclosure that is IP55 rated, the PX3 fans are designed to work in harshest elements. Due to the lower weight fan design and the self-cooling nature of the fan motor, the lifetime of the fan is extended, getting utilities one step closer to a maintenance free transformer.

Rugged Monitoring Reliable, high performance, immune to external influence, precision and customizable fiber optic temperature sensors and monitoring solutions. Monitoring solutions for Transformers, GIS, MV Switchgear, Breakers, Power Cables, Rotating Machines, and eStations.
